

Release Date: January 2023

This document describes new features and resolved issues included in the Safe Fleet Cloud Video Management (a.k.a. Commander) **v5.51.0** release.

New Features

NH16v2 support

This release adds support for the latest NH16v2 video recorder. This device is not fully supported yet and will operate with firmware v4 once available.

Resolved Issues

Server error

We have fixed a stability issue that could trigger server error messages when viewing or adding vehicles.

[VCM-18492]

TL4 firmware upload

We have solved a problem that prevented TL4 firmware update from being completed.
