

# InView 360 HD Driver's Daily Pre-Trip Checklist

At the beginning of each shift/day, please check the following to ensure they are working properly.

- Turn the vehicle on > 360 HD system turns on

## 1) Check Cameras

- Verify that the Default Live View (360° + Left Cam) displays after startup.
- Use the Driver/View (green) button to cycle through all 6 views on the monitor:
  - Top + Left    Top + Front    Top View
  - Top + Right    Top + Back    4 Cam Split

## 2) Check Signals

- Activate left turn signal > Monitor displays the left camera view.
- Activate right turn signal > Monitor displays the right camera view.
- Place the vehicle in reverse > Monitor displays rear camera view with back-up lines.

## 3) Check Events\*

- Press the Event/Panic (red) button > Verify that "Event Recorded" appears on the monitor.
  - \* You might not want to press this button every time you start up the vehicle, as it would result in multiple "panic" events being recorded.

## 4) Check Outriggers\*

- Press the Outrigger/Overlay (black) button > Verify that red bars appear on the 360° image
  - \* If your vehicle has outriggers but you do not see overlays, contact your administrator.
