

READ ME FIRST

To configure the *BodyVISION*, first read the “Getting Started” section in the *BodyVISION User’s Guide*: <http://bit.do/BVXV>

Unit Maintenance & Care

- ☐ ⚠ Do not mishandle or drop the *BodyVISION*. Doing so could damage the unit or its battery, cause serious personal injury, or result in smoke/fire.
- ☐ ⚠ Do not charge the *BodyVISION* with a device other than the factory supplied chargers, as it could cause serious personal injury or result in smoke/fire.
- ☐ ⚠ If there is noticeable damage to your *BodyVISION*, *do not* attempt to charge the device. Doing so could damage the unit or its battery, cause serious personal injury, or result in smoke/fire.
- ☐ ⚠ If the battery begins to expand or swell, *do not* attempt to charge the device. Doing so could cause serious personal injury or result in smoke/fire.
- ☐ ⚠ Do not expose the *BodyVISION* to temperatures above 122° F/below -4° F.
- ☐ Replace the battery every 12 months.

WARNING Magnetic Mount* Users:

* Optional, not included

- The magnet mount has a strong magnetic field; persons with pacemakers or other medical implants should avoid contact.
- Always rotate one of the mount plates to the right or left first before attempting to separate the plates: <http://bit.do/magclp>
- Always remove the back plate from the *BodyVISION* before docking it
