

Release Date: September 2020

The Safe Fleet product team is happy to announce the release of Safe Fleet Cloud Application Suite v5.29. This release includes Commander new features and improvements.

Commander New Features

Benefit from Student Tracing Capabilities

Commander users who have Student Tracking enabled in Live+, which provides information on riders, pick-up and drop-off, and vehicles, can now schedule video downloads based on a given student.

Schedule Bulk Downloads

Commander allows users to schedule multiple video downloads at once with a single CSV template. The Schedule Bulk Download new feature allows users to schedule up to a thousand downloads based on one or various vehicles, avoiding the repetition of the steps involved in the process.

Schedule Download **Schedule Bulk Download** **Students Tracing**

Choose File

 [Download Sample CSV Template](#) ←

To perform these tasks:

1. Access the Archive Manager through the Commander toolbar.
2. Click Schedule Bulk Download to display the dialog.
3. Download the Sample CSV template and configure the parameters you would like to include.
4. Upload the file by clicking Upload in the same dialog.

Commander Improvements

View Complete Archive IDs

Complete Archive IDs are now displayed in the Commander Dashboard and Archive Manager Print/Export tools, identically to how they are shown in the Archive Manager, offering a friendlier view of the listed items.

Archive Manager		Recurring Archive					
ID	Vehicle	Group	Category	Status	Filename	Type	Priority
<input type="checkbox"/>				Complete			
<input checked="" type="checkbox"/>	46ym609w1r	Bus DH4-61	Group	None	Complete	C:\temp\	Mani. Low
<input checked="" type="checkbox"/>	wm6wq5q9y3	Bus DH4-61	Group	None	Complete	C:\vMax	Mani. Low
<input checked="" type="checkbox"/>	74jk4756d8	Bus DH4-61	Group	None	Complete	C:\temp\	Mani. Low

ID	Vehicle	Group	Category	Status	Type
46ym609w1r	Bus DH4-61	Group3	None	Completed	C:\temp\vm
wm6wq5q9y3	Bus DH4-61	Group3	None	Completed	C:\vMaxVid
74jk4756d8	Bus DH4-61	Group3	None	Completed	C:\temp\vm

(Exported CSV File)

Support for additional DMP Ports

Prior to Commander v5.29, the DMP only listened to one port (normally configured as 31503 or 31502). This latest version of DMP now has the ability to listen to 2 ports at the same time.

Known Issues

- Student Tracing doesn't pick up students tracked via a tablet.
- If a student tracing video request is made for a vehicle with no recorder, request will be scheduled but never executed.
