

Release Date: October 21st, 2020

The Safe Fleet product team is happy to announce the release of Stream v2.1. This release includes some improvements and bug fixes.

Improvements

Benefit from strengthened high availability

New Health Check Endpoint has been added to provide increased high availability of the streaming platform.

Get reduce streaming recovery time

The implementation of new reconnection protocols results in reduced streaming service recovery time.

Bug Fixes

VMS-2667

A new vehicle can't be displayed on vehicles list

Fixed an issue where newly created or updated vehicles would not show in the Stream vehicle list panel.

VMS-2678

Problems with SSO and connection between Streaming API and Node

Fixed an issue with the access control that was causing intermittent connectivity loss of DVRs.
