

How to recover Video from IP Interview room Camera

1. Login to Coban Command Center

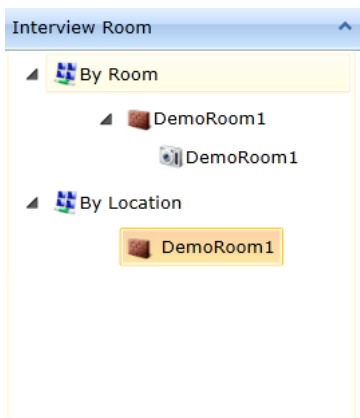

The screenshot shows a 'Sign in' dialog box with a background image of a police car. It contains three input fields: 'Authentication' with a dropdown menu set to 'Standard ID', 'User Name' with the text 'coban', and 'Password' which is empty. At the bottom right, there are 'Submit' and 'Cancel' buttons.

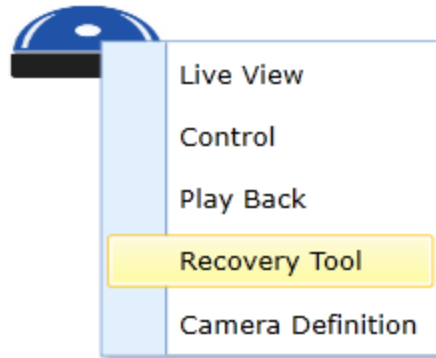

2. Select Products

3. Select the Camera

4. Right click and select "Recover Tool"

- Select the RED viddo. RED mean it is ether processing or not available

DemoRoom1: 1x1: Camera1

- Once recovered successfully, do a video search in Coban Command Center.

To manually pushed the videos from Coban Command Center to DVMS

1. Login to CCC
2. Select Admin
3. Select Product > Interview Room
4. Under Category> Select Integrated Mode (Note, the Integration Frequency can be set as immediately or Specific time)
5. Select Admin > Servers> Main> select the server
6. Select Schedule Tasks

The screenshot displays the 'Task Configuration' window in the Coban Command Center. On the left, a tree view shows the navigation path: Category > Scheduled Tasks. The main area contains a table with the following data:

Name	Value
System Integrity C	1
Database Backup	0
Export To DVMS	1
License Audit	0

The 'Task Configuration' panel on the right includes the following settings:

- Frequency:** Occurs: Daily
- Daily Frequency:** Occurs once at: [] []
- Duration:** Start date: <M/d/yyyy> [] [] [] [] [] [] End date: <M/d/yyyy> [] [] [] [] [] [] (optional)
- Buttons:** Export files to DVMS, Enable E-Mail Notifications

7. Click Export files to DVMS
