

This official firmware release applies to the TH4C recorder platform, and offers important product enhancements. It supersedes all previous versions.

Bug Fixes

The following bugs are addressed in this release:

vMax Live Plus (iVML) Support

- Resolves vMax Live Plus network configuration issues. vMax Live Plus is a Web-based solution providing GPS for Automatic Vehicle Location and telemetry data for monitoring vehicle sensors.

SD Card Formatting

- Addresses the delayed completion of SD card formatting under certain circumstances.

Enhancements

Retain Video on the Recorder for a Specific Time Window

- **Time Limited Recording** automatically deletes video and audio aged beyond a configurable number of days. This setting only removes video and audio from the recorder; it does not affect other data types such as telemetry, logs, or diagnostic records.

Disable Video Watermark for Improved Video Capture Performance

- **Video Watermarking** requires additional processing, which may negatively affect video capture performance on a fully loaded system (maximum number of cameras, frame rate, and quality). If necessary, you may choose to disable watermarking to enhance video capture performance. Watermark is enabled by default.

Additional Languages

- **Dutch and German language options** are available for the local and Web user interfaces.

Known Issues

Upgrading from Firmware v1.3.5.159

- It may take several attempts to upgrade from firmware v1.3.5.159. If the update fails or stalls for longer than 5 minutes, please try again, or contact Safe Fleet Technical Support for assistance.

Non-localized Language Fields

- The selected System → Language setting is not applied for Calendar months, DVR metadata, and keyboard entry of camera titles.

Compatibility

- Minimum software versions:
 - vMax View - 4.9.x.x
 - Evidence Manager 3.3.0.15
 - Commander 5.27.x
 - DMP - 6.6.33
 - vMax Web (PC browser) - Internet Explorer 11 (64-bit)
- Minimum vMax Live firmware:
 - Core Controller v1.08.0629
 - VLPB-* (CalAmp Device)
