

Important Update (Jan 30, 2026): End of Support for vMax View Moving Forward with Evidence Manager

March 31, 2026

End of Support for vMax View

Dear Valued Customer,

At **Safe Fleet**, we're continually working to deliver the most secure, reliable, and high-performing video solutions possible. As part of this commitment, we're excited to introduce **Evidence Manager**, our modern video evidence playback application – and to share important news about the future of **vMax View**.

Introducing Evidence Manager: What's Next for You

As technology and security requirements evolve, vMax View no longer meets the performance and cybersecurity standards Safe Fleet is known for. Because of this, we will be retiring vMax View and moving forward with **Evidence Manager** – our next-generation video evidence playback solution.

Evidence Manager offers everything you rely on today, plus more, including:

Enhanced cybersecurity
protections

Improved performance
and stability

Support for high-resolution
video playback

Expanded camera and
device compatibility

This transition ensures you continue to receive a dependable, future-ready video management experience.

March 31, 2026:

End of Support for vMax View

After this date:

Technical support, updates, and security patches for vMax View will end.

vMax View may continue to function, but will no longer be supported.

Security risks and reliability issues may increase over time.

To avoid disruption, we strongly recommend upgrading ahead of the end-of-support date.

Training Videos and Customer Support

What is Evidence Manager?

Evidence Manager is Safe Fleet's unified video management application that allows you to:

Review live and recorded video

Manage and monitor recorder health

Create and export evidence files for legal use

Remotely manage devices

Evidence Manager runs on Windows computers and supports both standalone and enterprise environments. It also integrates with other Safe Fleet solutions such as Video Management and Nexus.

Supported Recorders & Versions

Evidence Manager 64-bit

- The recommended upgrade path from vMax View
- Supports all current Safe Fleet recorders
- Enables high-resolution playback (up to 16 channels)
- Full support for Safe Fleet fisheye cameras
- Delivers the best performance and newest capabilities

Evidence Manager 32-bit

Supports discontinued recorders only including: TL, TX, DX, HX, NX, and MobileView recorders.

New Requirement: Safe Fleet Cloud Account

To use Evidence Manager, a **Safe Fleet Cloud account** is required. This change improves security and makes your experience simpler and more connected.

Enhanced Security:

Stronger protections against unauthorized access

Simplified Access:

Single Sign-On (SSO) for all Safe Fleet applications

Faster Support:

Our team can assist you more efficiently

Do You Already Have a Safe Fleet Cloud Account?

[Follow these instructions](#) to determine if you already have a Safe Fleet Cloud Account.

If you already have an account, no additional setup is required.

Please proceed to downloading Evidence Manager:

1

Sign in to the Safe Fleet Community.

Next Steps

To ensure a smooth and stress-free transition:

- ✓ Begin planning your upgrade well before March 31, 2026
(vMax View will continue to work but will become unreliable over time, with increasing security and performance risks.)
- ✓ Confirm your Safe Fleet Cloud account status
- ✓ Download and install the appropriate version of Evidence Manager
- ✓ View on-demand or register for live online classroom training

Need Help?

We're Here for You

Our dedicated migration team is ready to support you with:

- ✓ Upgrade planning
- ✓ Installation assistance
- ✓ Training and onboarding
- ✓ Ongoing support
